

INTEGRATING AI IN ENGLISH DIALOGIC LEARNING: A BRIEF REVIEW AND DISCUSSION

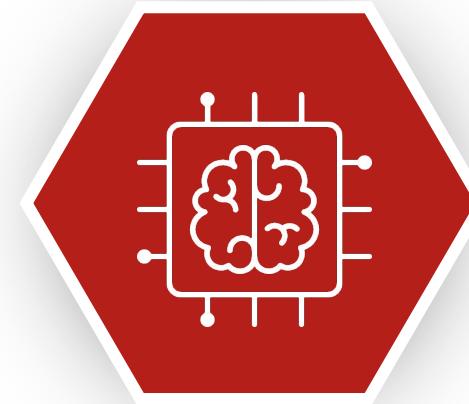

Date: June 10, 2023

Presented by: Phuong Anh Do, MA

Two major trends:

**The global need for
English proficiency**

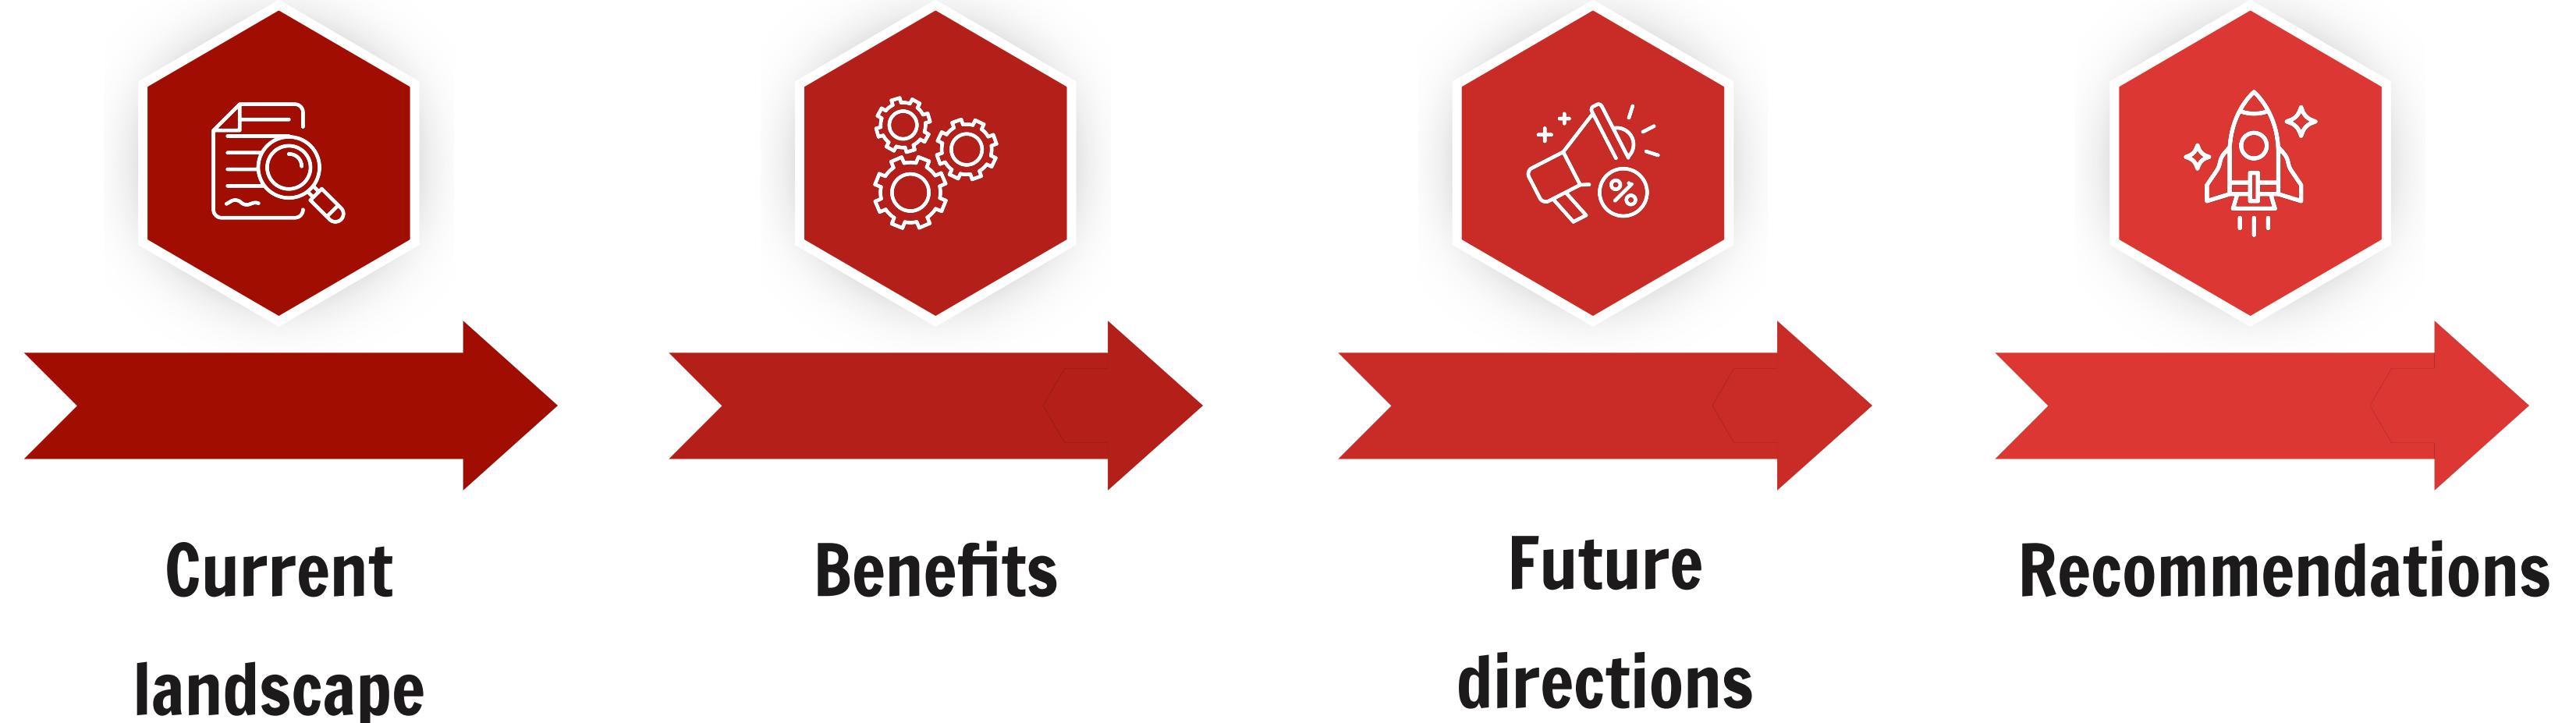

**Rapid rise of
Artificial Intelligence**

AI reshape dialogic learning

Timeline

The Shift in English Language Learning

Language as a social, interactive process
(Vygotsky, 1978)

From Grammar-Translation to Communication

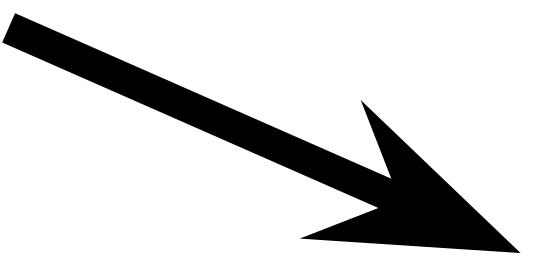

Goal: Develop Communicative Competence, not just linguistic accuracy (Savignon, 2017)

AI's capabilities (Malnatsky et al., 2025)

Natural Language Processing

Personalization

Adaptive Feedback

Support
Dialogic learning

Key Roles of AI in Learning (Pavlova, 2024)

Personal Tutor

Study Buddy

Socratic Opponent

Collaboration coach

Possibility Engine

Motivator

Benefits and Impact

- Radical Personalization
- Boosting Motivation & Confidence
- Immediate Feedback & Deeper Thinking

#1: Radical Personalization

(Vekneswary, 2025)

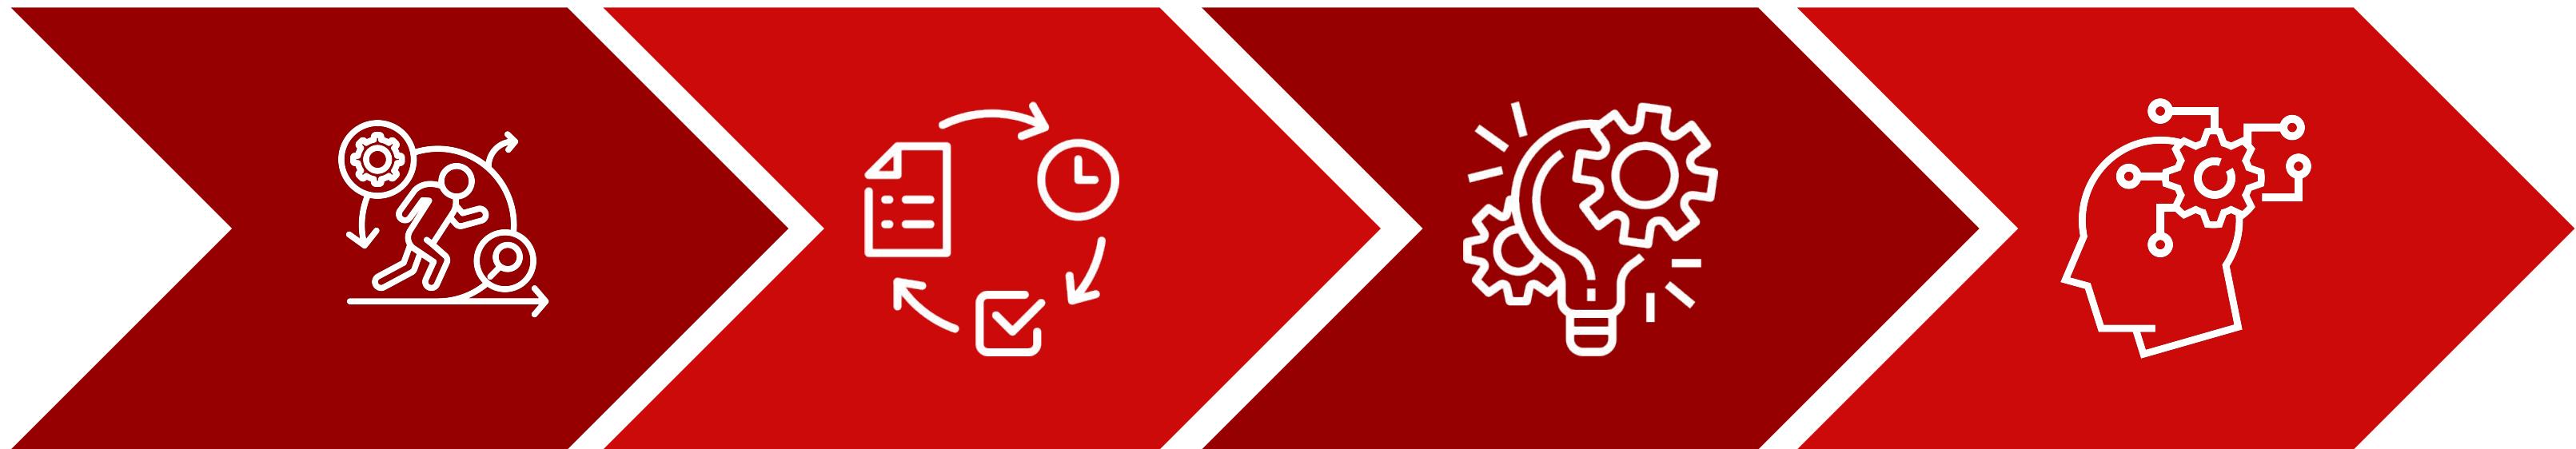

**Tailors content,
pacing, and
interaction
style**

**Creates
customized
learning
journeys in
real-time**

**Ensures
material is
challenging
but not
overwhelming.**

#2: Boosting Motivation & Confidence

Reduces the "fear of speaking" and communication apprehension.
(Edmett et al., 2024)

Non-judgmental practice environment.

Tailored content is more engaging and relevant.

Studies show increased self-confidence, motivation, and well-being.
(Hashemifardina, 2025)

#3: Immediate Feedback & Deeper Thinking

Instant Feedback Loop

Correct errors before they become habits.
(Poolamannil, 2025)

Beyond Right/Wrong

LLMs can explain the why behind a correction.

Fostering Critical Thinking

AI can be programmed to ask probing, open-ended questions, pushing learners beyond simple recall.
(Ifelebuegu, 2023)

The Path Forward: Recommendations for Responsible Integration

1. Develop Robust Ethical Guidelines

Prioritize transparency, fairness, and accountability.
(Azman & Tümkaya, 2025)

2. Integrate with Sound Pedagogy

Technology should augment, not replace, teachers.
Co-design tools with educators. (Poolamannil, 2025)

3. Empower Users with AI Literacy

Teach students and educators to critically assess AI's capabilities and limitations. (Hao et al., 2025)

Critical Consideration: Context is King

**Current AI models
are often
Western-centric.
(Alm & Watanabe,
2023)**

**Effective dialogue is
culturally
dependent.**

**The future is
localised:
"grassroots and
context-sensitive AI"
co-created with local**

Conclusion & Key Takeaways

AI has transformative potential for English dialogic learning.

Key Benefits: Deep Personalization, Increased Motivation, and Immediate Feedback

The Way Forward: An ethical, pedagogically-sound, and context-sensitive approach is essential.

The goal is a human-AI partnership that empowers both learners and educators.

THANK YOU!
